

The Most Cost-Effective, Feature-Rich Drug Plan Available

VitoriRx is a member-first, state-of-the-science pharmacy program that goes beyond PBMs—built better from the ground up for the lowest net cost results.

We started with what’s familiar—access to 67,000 pharmacies, including all major retail chains, plus convenient home delivery. And we reinvented from there with proprietary payment controls and remarkable member support and cost relief.

Industry Firsts You Won’t Find Anywhere Else

- **40% Savings over PBMs** | Acquisition cost controls, formulary safeguards, clinical management, agile drug sourcing, and specialty Rx cost protection yield unmatched savings.
- **No Spread Pricing** | Proprietary technology generates lowest acquisition cost contractual pricing—what’s paid to the pharmacy is what the employer pays.
- **No Low-value, Rebate-driven Drugs** | Our drug formulary is uniquely constructed using advanced clinical comparative effectiveness research.
- **More Transparent** | A low per-script fee with no hidden charges, shared savings, or rebate retention, plus open and accurate data access.
- **Full Pass-through of Rebates Monthly** | Unique construction allows access to manufacturer credits unavailable to PBM’s plus drug-level rebate reporting.
- **Unmatched Member Concierge Support** | Pharmacist help, financial assistance, and international sourcing—all at no extra cost.

Unmatched Ethical Practices, Services, and Results

PBMs	VitoriRx
Hidden fees and clawbacks from pharmacies.	Single per-script fee with no other charges.
Artificial AWP-based pricing and rebate-driven formularies with higher-cost, lower-value drugs.	Transparent acquisition cost pricing with high-value drugs at the lowest cost.
Collect undisclosed spread between what is paid to pharmacies and what is charged to the employer.	What is paid to the pharmacy is what is charged to the client with digital proof.
Convuluted 3-year contracts favor PBM interests, not the client’s. Savings are opaque and staged over three years.	Clean and clear 1-year contracts with a no-penalty exit. Savings are immediate.
Gag clauses prohibit pharmacists from informing members if a drug costs less than the copay.	Members always pay the actual cost or copay, whichever is less.
Own pharmacies and drive members to these pharmacies to pump profit.	Contract with 67,000 pharmacies and all major chains so members can choose.
Make data access difficult and opaque and prohibit auditing.	Complete, clean data and full auditing.
Use third-party rebate aggregators who take a percentage of rebates.	No third-party rebate aggregators.
Partial rebates are remitted to the client every three months to make money on the float.	Pass through 100% of all rebates and manufacturer credits monthly, a first in the industry.

Value-Based Design

VitoriRx measures value based on cost and clinical efficacy. Our Comparative Effectiveness Model maps thousands of pages of clinical data to prioritize drugs that offer the best overall value. We often find that the most clinically-effective drugs cost less!

Leading Edge Drug Pricing

Our proprietary pricing technology provides the most accurate snapshot of nationwide drug prices in the industry. It identifies the lowest cost accepted at over 67,000 nationwide pharmacies, including all of the national chains.

Data from all pharmacies is automatically updated daily, reflecting both acquisition cost and market-weighted supply. Under our system, pharmacies are contractually obligated to provide medications to our plan members at the lowest price accepted.

Daily monitoring of the lowest accepted pricing for generic, brand, and specialty drugs across 67,000 nationwide pharmacies, including all major chains.

Claims adjudication ensures pharmacy network is reimbursed at the lowest accepted price.

High-Cost Rx Cost Control

At no extra costs or shared savings!

These VitoriRx programs can eliminate significant out-of-pocket expense for members and save the plan hundreds of thousands, and even millions, of dollars. Importantly, we ensure compliance with all applicable rules and regulations, including guidance on necessary modifications to plan documents.

Specialty Inclusion Program (SIP)

VitoriRx proactively evaluates the safety and efficacy of new drugs and biologics before adding them to the formulary.

Smart Sourcing. Big Savings.

PBMs cannot use alternative sourcing channels to deliver additional significant savings, especially for high-cost and specialty medications. Our preferred channels drive 70% to 90% savings on many specialty and high-cost drugs. This allows members to access medications, at no cost, from brick-and-mortar international pharmacies whose safety protocols are modeled after the US Food and Drug Administration. Sourcing includes pharmacies in Canada, the United Kingdom, and New Zealand.

Member Financial Assistance

Third-party "bolt-on" solutions for member financial assistance introduce HIPAA risk, are challenged to work with pharmacy programs, and keep a large amount of savings for themselves. VitoriRx integrates these vital programs into its multi-layered cost controls to improve patient care and deliver significant plan and patient savings.

We accomplish this by leveraging drug manufacturer and other financial assistance for members on specialty medications and manufacturer copay coupons to remove member and plan cost. Our dedicated patient advocates investigate options and coordinate between members, prescribers, and pharmaceutical manufacturers to ensure the best financial outcome.

A blue trapezoidal graphic with a white Vitori Health logo on the left. To the right of the logo, the text reads: '40%+ SAVINGS WITH BETTER PLAN VALUE AND MEMBER SUPPORT' in white, bold, uppercase letters.
